VMware	◐					●		
Citrix			◐		◐	●		●
Microsoft	◐		◐					

Granular persona Management is the ability to manage the settings in the portable profile.

Validation of UX = User Experience

Design is the capability to layout a specific suggested infrastructure and desktop image for next steps.

Data Migration is automatically harvesting user authored files from legacy desktops to the local/external cloud

Persona migration is the ability to support a move from V1 to V2 (example XP to Win 7)
