Comprehensive Next Generation Desktop Assessments

Many organizations are migrating to VDI (Virtual Desktop Infrastructure), such as Citrix XenDesktop or VMware View, in order to streamline desktop management and lower costs. Many are also making the move to Windows 7. Liquidware Labs Stratusphere Fit gives your

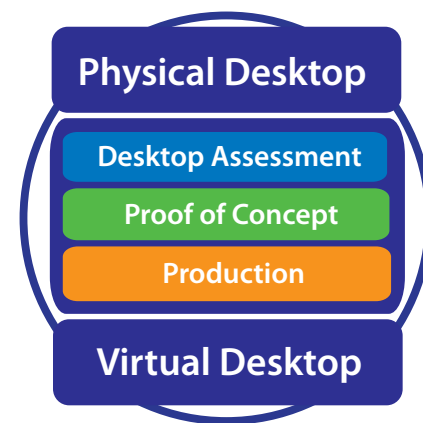

organization direction by fully assessing your infrastructure for its next generation desktop fitness. The solution provides detailed reports and comprehensive information about your infrastructure for decision support and a clear path forward.

Desktop Assessment, Infrastructure Analysis, Recommended Design

Stratusphere Fit is your first and easiest step on the path to virtualizing enterprise desktops. Use Stratusphere's comprehensive VDI Fit analyzer and detailed reports to assess your organization's current network, user, and application usage.

Stratusphere Fit monitors and logs a variety of individual desktop and key user performance metrics at all integral levels of your infrastructure – from the desktop and user, to the network, to the data center, to the SAN.

After your data collection period, usually a two week minimum to ensure accuracy, Stratusphere Fit enables you to generate summary and detailed reports, giving you decision support information at a glance. These assessment reports are an essential component to ensuring a successful design and deployment of your next desktop strategy. Investing in an assessment is a sure way to save time, money and ensure success protecting your reputation!

Assess Current Network,
Usage Metrics, Application
Usage & Constraints

Identify Good, Fair, & Poor
candidates for VDI in your
environment

Right-size your
infrastructure for optimal
user experience

Lower Risk when designing
new infrastructure
requirements

Migrate with efficiency &
leave no data or user
behind

Automate the Deployment
of users & configurations

Proof of Concept

Transitioning users to VDI just got incredibly fast and easy! When setting up a POC, Liquidware Labs Stratusphere™ and Liquidware Labs ProfileUnity™ enable organizations to measure baselines on existing user configurations and cost-effectively plan, migrate, and manage their next generation desktop without affecting their current physical desktop configuration.

From Assessment to POC to Production

The same technology used to assess your environment is also available to ensure consistent deployment, migration, and user experience. Stratusphere UX and ProfileUnity go to work in your new environment to continually monitor performance at all levels to ensure optimal level of service for your users.

The Liquidware Labs VDI Essentials bundle ensures that the new desktop and applications are delivered consistently while continually rating your user experience.

Qualified Partner Network

Liquidware Labs has built a network of partners who are trained and licensed to assess your organization with Liquidware Labs Stratusphere Fit, a comprehensive assessment solution that incorporates industry proven methodologies and technologies to ensure you have the information needed for a desktop strategy based on your actual user and application usage patterns.

Liquidware Labs certified partners can guide and work side-by-side with you every step of the way.

VDI User Experience & Disk IOPS
Green Good • Yellow Fair • Red Poor

Stratusphere is a comprehensive and award-winning platform to assist you in ensuring the success of your next desktop strategy.

Assessment & Design

Spend less time • Spend less money • Get better results • Streamline your migration • Ensure Positive User Experience

How do we get started?

Relax and take a deep breath because Liquidware Labs has taken all of the guesswork out of getting your organization to its next generation desktop. Stratusphere is a virtual appliance which you use to observe application and user consumption of network, storage, CPU, memory and other compute resources, providing the basis for a solutions oriented next generation desktop.

Our award-winning product Stratusphere and our certified partner network can help you answer:

- What users do we migrate first?
- What hardware and software is required?
- How do we ensure user experience?
- How do we migrate user data and settings?
- How do we right size systems for this next migration?

Great Metrics • Great Data • Great Decisions!

- Assess CPU, memory, storage, network latency, graphics intensity, disk IOPS (input/output per second), unresponsive applications & more
- Capacity plan & create a solution design
- Identify good, fair & poor VDI Fit users
- Application usage & user tracking
- Active Directory user & group aware
- Detailed usage & access reports
- Full custom reporting & ODBC views

Exclusive pricing through your authorized Liquidware Labs partner

Your certified Liquidware Labs partner is eligible to provide you with special pricing for your assessment. The retail price for each Stratusphere user license is \$39.00 for full assessment, diagnostics & user experience functionality. Now, for \$6.95 or less per user, your partner can provide you with an assessment specific license called Stratusphere Fit.

After your assessment you will most certainly want to license Stratusphere for its award- winning UX (User Experience) features. Stratusphere UX delivers intuitive reporting and alerting of infrastructure subsystems and user experience ratings, ensuring a productive end-user desktop is being delivered.

Should you choose to license Stratusphere UX after your assessment, a per user credit will be applied toward your licenses! Stratusphere UX is integral to ensuring service levels for your end users while providing detailed information for your help desk staff in diagnosing and supporting users. Please see additional brochure for more information.
